

# Lisk Fact Sheet

## Mission Statement

In a world where only developers with a very specific skill-set can create blockchain applications, Lisk provides inspiration, access and support in the form of great tools to anyone who wants to realize the opportunity of applied blockchain technology.

<b>Founders</b>	CEO & President, Max Kordek and CTO & Vice President, Oliver Beddows
-----------------	--

<b>Headquarters</b>	Zug, Switzerland
---------------------	------------------

<b>Founded</b>	January 30, 2016
----------------	------------------

<b>Network Live</b>	May 24, 2016
---------------------	--------------

<b>Capital Raised from ICO</b>	14,052 BTC
--------------------------------	------------

<b>ICO Timeframe</b>	February - March 2016
----------------------	-----------------------

<b>Peak Market Cap</b>	\$4.5 Billion (January 7, 2018)
------------------------	---------------------------------

<b>Number of employees</b>	44
----------------------------	----

<b>Lisk Wallets Created</b>	193,821
-----------------------------	---------

<b>Sector</b>	Software, FinTech, Blockchain, Cryptocurrencies
---------------	---

<b>Companies of the Lisk Foundation</b>	Lisk, Lightcurve
---	------------------

# Lisk Fact Sheet

## Lisk Products

### Lisk Core

Lisk Core is a tool for advanced technical users who want to access Lisk's main network blockchain data, secure the network infrastructure or attain delegate forging access.

### Lisk Hub

Lisk Hub is an all-in-one solution to manage Lisk IDs, access and send LSK tokens, as well as vote for delegates. It combines functionality from the former wallet and blockchain explorer. In the future, Lisk Hub will feature a DEX (decentralized exchange), sidechain registration and the ability to launch ICOs.

### Lisk Commander

Lisk Commander is a CLI to the Lisk Core APIs. In the future, it will support developers in bootstrapping and managing sidechains.

### Lisk Elements

Lisk Elements is a collection of libraries, such as the shared cryptography, an API representation, transaction logic for local signing and important constants for the ecosystem.

### Lisk Nano

Lisk Nano is the old Lisk wallet that enables you to access your Lisk ID. It provides a minimal user interface and a wide range of functionalities for beginners and advanced users. With Lisk Nano, there is no need for blockchain synchronization as it connects directly to the Lisk network.
